

Butterflies, Bugs and Blocks

Directions: Cut along the dark lines below to cut into 12 butterflies and bugs. Get your blocks ready. Put two large building blocks together. Cut each butterfly or bug picture in half along the faint line in the middle. Use a glue stick to paste the bugs into place on the blocks. Take apart the blocks once you have pasted the picture on to let the glue dry. Mix up all of the blocks and try to match up all the butterflies and bugs. Want to add in movement? Each time you put a matching pair together move like a butterfly (flap arms up and down) or a bug (crawl along the floor). Try hiding the blocks around the room. The child has to find the bugs and put them together.
