

FREE Caterpillar Activity Ideas:

Directions:

Print the caterpillar page in color or black and white.

Activity #1: Using DOT markers, fill in the circles of the caterpillars with different colored dot markers. To learn how to make your own ink dabbers go to www.YourTherapySource.com/DOTvideo

Activity #2: Laminate the page. Make small balls of clay using the thumb and first two fingers of the hands. Place the balls of clay on each circle to create the caterpillars body.

Activity #3: To encourage fine motor skills further squeeze glue onto each circle. Place puff balls next to the picture. The child can use tongs to pick up a puff ball and place it on glue dots on each circle to create a three dimensional work of art.

Activity #4: Complete the picture on page 4. The child can draw each circle of the caterpillars body to complete the picture.
