

# Sight Word Mix Up Group Game

Write several sight word cards that the group is learning. Give one sight word card to each child playing and create a duplicate pile of all the sight words. Cut out the list of action cards below. Create two piles of cards face down - one of the sight words that you are using and one of the action cards. The leader now turns over a sight word card and an action card. Call out the word and the action. Any child that is holding that sight word card begins performing the action. For example: "all children holding 'AND' should jump in place". Turn over the next sight word card and movement card. Call out the word and action. Continue until all the children are moving then the leader shouts "MIX UP". All the children must change sight word cards with another child. Shuffle the leader's sight word and action cards. Begin the game again.
