

HOW TO PLAY WHAT DID THE SHARKS EAT

There are several different ways to play this game depending upon what skills you want to work on.

1. Shark Charades: One child moves like one of the animals on the bottom of the page. The other child has to guess which numbered shark ate that animal. For example, if you move like a jellyfish, the person would guess Shark #2.

2. Connect the Sharks: Print the page or mark up the PDF on the screen. Draw a line from each shark matching it to the animal it ate.

3. Match the Shark Numbers: Need to work on visual discrimination and visual closure skills? Have the child tell you which animals matches each shark. For example, shark #1 ate animal #2.
