

The Higher You Climb, The More You See

Directions: Create a goal for yourself. Every time you accomplish the goal color in one star. When you have colored in all 15 stars, cut out the circle. Cut along the dotted lines to create the spiral. Punch a hole in the letter 'O' in the word GOT. Tie a string thorough it and hang in from the poem on the previous page to display it.

The Higher You Climb, The More You See

**I thought I was stuck, just spinning around,
A circle so flat, so close to the ground.**

**But then I saw, with brand-new eyes,
Each step ahead helped me rise!**

**Round and round, but climbing high,
Reaching for stars up in the sky.**

**With every twist, with every star,
I see now—I've come so far!**

**A little shift, a different view,
And now I see how much I grew!**

**No more limits, no more fears.
I'll keep reaching through the years**
